

Use of Logic Models to Promote Change Self-Assessment Form

Name: _____ School/Site: _____ Date: _____

Indicate your understanding of the components of a logic model and perceived degree or level of implementation over time as part of the efforts of your project/team. This form may be completed individually or as part of group/team activity.

Components of Logic Models (i.e., aspects that may be in use)	Level of Implementation Over Time				
	Never	Rarely	Occasionally	Frequently	Always
1. As a project/team, we receive support and assistance in the use of logic models					
2. As project/team, our desired outcomes are clearly identified and serve to drive our ongoing efforts					
3. As a project/team, we have identified the specific activities that will likely lead to specific outcomes					
4. Specific resources are in-place that support our ongoing activities					
5. As a project/team, we identify the specific measures by which we determine the measure of accomplishment with respect to our activities (i.e., data sources, reports from others, etc.).					
6. We routinely review the logic model(s) we have developed to aid in our ongoing efforts.
