

College Credits for High School Courses

Manteca Unified School District is committed to comprehensive articulation of instructional programs between secondary and post-secondary institutions, usually referred to as “2+2” articulation. The “2+2” articulation links the high school and CTE programs with the post-secondary institution. These articulation programs lead to an Associate Degree or program specific certificates. This articulation process is a system designed to help students to advance from one course, program, or educational level to the next without unnecessary repetition of essentially similar courses for which credit has been received. Students who have completed articulated courses in high school may receive college credit.

ARTICULATED COURSES
