

Prepare for Wildfire Smoke!

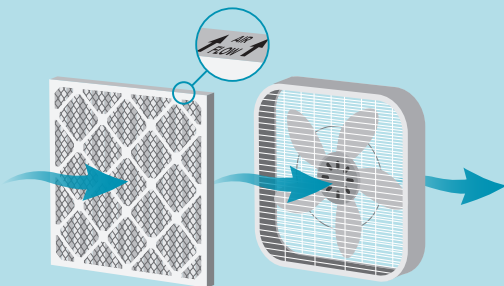

Make your own box fan filter.

You'll need:

- 20" box fan.
- 20" furnace filter with 11-14 MERV rating.
- Bungee cord or tape.

Attach filter to back of fan with bungee cord or tape.

Make sure the air flow arrows on filter point to front.

- Use in a small room with windows and doors closed.
- Change filter when dirty.
- Do not leave on when you aren't in the room.
