

## RENTAL AND SERVICE CHARGES

The Board desires to cooperate with other agencies and community organizations by making available school facilities and certain specified items of equipment or services when so doing will not conflict with the normal operation of the school.

To this end, all schedules of rental and service charges shall be kept as low as possible considering operation and maintenance costs.

All income received from the rental of Board-owned property shall be credited to the General Fund. Facilities will not be made available on a regular basis for private business.
