

## REPORTING OF HAZARDS

The Board is concerned with the safety of students and staff and, therefore, complies with all Federal and State laws and regulations to protect students and staff from known hazards that pose an immediate risk to health and safety.

### Toxic Hazards

Toxic hazards exist in chemicals and other substances used in the school setting such as in laboratories, science classrooms, kitchens, and in the cleaning of rooms and equipment.

The Superintendent appoints an employee to serve as the District's Toxic Hazard Preparedness (THP) officer. The THP officer:

1. identifies potential sources of toxic hazards in cooperation with material suppliers who supply the THP officer with safety data sheets (SDS);
2. ensures that all incoming materials, including portable containers, are properly labeled with the identity of the chemical, the hazard warning, and the name and address of the manufacturer or responsible party;
3. maintains a current file of SDS for every hazardous material present on District property;
4. designs and implements a written communication program which:
  - a. lists hazardous materials present on District property;
  - b. details the methods used to inform staff and students of the hazards and
  - c. describes the methods used to inform contractors and their employees of any hazardous substances to which they may be exposed and of any corrective measures to be employed;
5. conducts a training program in compliance with State and Federal law for all District employees to include such topics as detection of hazards, explanation of the health hazards to which they could be exposed in their work environment, and the District's plan for communication, labeling, etc. and
6. establishes and maintains accurate records for each employee at risk for occupational exposure including name, social security number, hepatitis B vaccine status, results of exams, medical testing and follow-up procedures for exposure incidents, and other information provided by and to health care professionals.

In fulfilling these responsibilities, the THP officer may enlist the aid of county and municipal authorities and others knowledgeable about potential toxic hazards.

### Asbestos Hazards

In its efforts to comply with the Asbestos Hazard Emergency Response Act, the Public Employment Risk Reduction Program (PERRP), and the Asbestos Abatement Contractors Licensing Act, the Board recognizes its responsibility to:

1. inspect all District buildings for the existence of asbestos or asbestos-containing materials;
2. take appropriate action based on the inspections;
3. establish a program for dealing with friable asbestos, if found;

4. maintain a program of periodic surveillance and inspection of facilities or equipment containing asbestos and
5. comply with EPA regulations governing the transportation and disposal of asbestos and asbestos-containing materials.

The superintendent appoints a person to develop and implement the District's Asbestos Management Program which ensures proper compliance with Federal and State law and the appropriate instruction of staff and students.

The Superintendent also ensures that, when conducting asbestos abatement projects, each contractor employed by the District is licensed pursuant to the Asbestos Abatement Contractors Licensing Act.

#### Occupational Exposure Training

All employees with occupational exposure are required to participate in a training program at the time of their initial assignment to tasks where occupational exposure may occur.

Follow-up training for employees is provided one year after their initial training. Additional training is provided when changes such as modifications of tasks and procedures or institution of new tasks and procedures affect employees' occupational exposure.

A record of attendance at occupational exposure training is completed and maintained by the THP officer following each training session. These records are maintained for three years from the date of the training.

#### Records Availability

All records required to be maintained are made available upon request for examination and copying by the employee, employee representatives, and under the provisions of PERRP. Medical records, however, are not made available to employee representatives or other persons without written consent of the employee.

#### Other Conditions Injurious to the Safety or Health of Building Occupants

In addition to the reporting of toxic hazards, the Board directs the Superintendent/designee to comply with all board of health inspections, to ensure that conditions injurious to the safety or health of persons on District property are minimized.

During a board of health inspection, each building principal/designee provides:

1. access to the building and grounds during regular school hours;
2. a record of inspections of the school grounds and buildings for dangerous and recalled products;
3. any records or other information the board of health considers necessary to evaluate the health and safety of the school and
4. a representative who accompanies the sanitarian during the course of the inspection, with advance notice from the board of health.

Liability Disclaimer

Nothing in this policy should be construed in any way as an assumption of liability by the Board for any death, injury, or illness that is the consequence of an accident or equipment failure or negligent or deliberate act beyond the control of the Board or its officers and employees.
