

BUILDINGS AND GROUNDS SECURITY

The Board recognizes the value of electronic surveillance systems in monitoring activity on school property and in school vehicles in protecting the health, welfare, and safety of its students and staff. Carefully weighing the rights of privacy of students and staff against the District's duty to maintain order and discipline, the Board authorizes the use of electronic surveillance systems.

Cameras

1. Cameras are not positioned in areas where individuals have a reasonable expectation of privacy.
2. The administration provides prior written notice to staff, students, and parents/guardians that electronic surveillance may occur on school property or in school vehicles. In addition, appropriate signs are posted in building entrances and at other locations deemed appropriate by the administration to inform visitors that electronic surveillance may occur on district property.
3. The use of cameras in transportation vehicles is supervised by the building principals and the transportation supervisor.
4. The use of cameras is subject to District policies concerning the confidentiality of student and staff records.
5. Surveillance cameras are used only to promote the order, safety, and security of students, staff, and property.

Metal Detectors

Notices are posted at each main doorway and in student handbooks explaining that weapons are not permitted at school and that students may be required to submit to a metal detector check.

1. Prior to beginning metal detector checks, an administrator or law enforcement officer explains the process to the student body, emphasizing that checks are intended to maintain a safe school environment.
2. The administrator or officer checks each student by visually searching in his/her locker and having them bring contents to a checkpoint.
3. The administrator or officer will ask the student to remove all metal-containing objects from his/her clothing and personal effects. The administrator/officer scans the student without touching him/her, as well as the student's personal effects. If the student refuses to cooperate, the administrator/officer may proceed with the check in the presence of another adult.
4. If the metal detector is activated during scanning of the student's effects, the administrator/officer opens the student's bag, purse, etc. and looks for weapons. If the detector is activated during scanning of the student's person the student is given a second opportunity to remove any metal-containing object from his/her person.
5. If the metal detector is again activated, a same-sex administrator/officer conducts a pat-down search of the student's outer clothing in the area where the metal detector was activated. If the administrator/officer feels an object on the student's person, the student is given an opportunity to remove the object. If the student refuses, the administrator/officer escorts the student into a private room and removes the object from the student in the presence of an adult witness of the same sex.
6. If a properly conducted search yields a weapon or any other illegal material, it is turned over to the proper legal authorities for ultimate disposition.
