

Stafford Municipal School District
Quarterly Investment Report
AUGUST 31, 2022

Foreword

Under the Public Funds Investment Act (PFIA), governmental units are required to have investment policies, restrict investment portfolios to only those investments specifically authorized by law, and submit quarterly reports to the governing body which disclose both the book and market values of investments held.

The Stafford Municipal School District is in compliance with the PFIA. All investments purchased meet the three basic tenets included in the District's investment policy—investment safety, investment liquidity and investment yield.

The day-to-day management of the district's cash and investment position is the responsibility of the Chief Financial Officer.

In accordance with Section 2256 of the Government Code (Public Funds Investment Act), Stafford Municipal School District has adopted a written investment policy. Not less than quarterly, the investment officers of SMSD must prepare and submit to the Board of Trustees a written report of investment transactions that have taken place. The report must include the following elements:

- Detailed description of the investment position of SMSD on the date of the report.
- Summary statement of each pooled fund group including beginning market value for the reporting period; additions and changes to the market value during the period and ending market value for the period.
- Statement of the book value and market value of each invested asset at the beginning and end of the reporting period.
- Statement of the account, fund or pooled fund group for which each asset was acquired.
- Statement of the compliance of the investment portfolio with SMSD's investment policy and investment strategies and with state law.

Stafford Municipal School District is in compliance with the Public Funds Investment Act. All investments purchased must meet the three basic tenets included in the investment policy—safety, liquidity and yield.

The accompanying investment report represents the quarter ending August 31, 2022.

TexPool

TexPool is a public funds investment pool administered by the State Comptroller. This pool was transferred to the Comptroller's office since the closure of the State Treasurer's office on August 31, 1996. Public funds investment pools are authorized under Chapter 2256 of the Government Code. The value of the pool at August 31, 2022 was \$24.6 billion. The District's investment in this pool as of August 31, 2022 was \$4.9 million.

The State Comptroller's Office issues a Quarterly Report on the financial status of TexPool. The cover letter for the quarter ended August 31, 2022 from TexPool provides information on the TexPool portfolios. These investment portfolios are on file in the Business Office.

Lone Star Investment Pool

The Lone Star Investment Pool ("LSIP") is a public funds investment pool administered by the Texas Association of School Boards with investment advisory services by CAPTRUST Financial Advisors. Two other firms, American Beacon Advisors and Mellon Investments Corporation, manage the investment and reinvestment of Lone Star's assets. Public funds investment pools are authorized under Chapter 2256 of the Government Code. The objective of the pool is to maintain the safety of principal, while providing participating government entities with the highest possible rate of return for invested funds. To achieve its objective, the pool invests solely in obligations issued or secured by the U.S. Government and its agencies or instrumentalities.

Participants in the pool own pro-rata interests in the underlying assets of the fund, and a participant's sole source of payment from its investments in the pool is the market value of such assets.

The following reports show the transactions during the quarter at both book and market value for each account maintained by the district with the Lone Star Investment Pool ("LSIP"). The book value for each account represents the principal amount of the monies invested by the district plus allocated interest. Market value represents the value of investments held by LSIP August 31, 2022 based on reports from the custodian bank which are verified by the investment consultant.

Investment Report Glossary**

Book Value Book Value equals the face amount minus any unamortized discount or plus any unamortized premium

C/P Commercial Paper is an unsecured promissory note issued by a corporation with a fixed maturity of no more than 270 days. Most commercial paper is non-interest bearing and sold at a discount from par.

Cash Cash is considered to be the most liquid (readily available asset on the financial statement). Cash includes readily available cash held by the department, current bank accounts and certificates of deposit.

CUSIP Committee on Uniform Securities Identification Procedures; it is the identification number on all securities (usually nine digits in length).

FHLB Federal Home Loan Bank System, established in 1932, it includes twelve Federal Home Loan Banks and their member institutions. Federal Home Loan Banks are instrumentalities of the United States and operate under the supervision on the Federal Housing Finance Board.

FNMA corporation, and is the largest investor in home mortgages in the United States. FNMA provides funds to the mortgage market by purchasing mortgage loans from lenders. FNMA was originally incorporated in 1938 as a wholly owned government corporation but the Housing and Development Act of 1968 changed FNMA to a federally chartered corporation.

Investment Pools Investment pool means an entity created under this code to invest public funds jointly on behalf of the entities that participate in the pool and whose investment objectives in order of priority are, preservation and safety of principal; liquidity; and yield.

Investments Investments are defined as securities and other assets acquired primarily for the purpose of obtaining income or profit.

**Stafford Municipal School District
Investment Report Glossary (Continued)**

Market Value	How much money you can get for the agency security, if you were to sell that security on a given date. Market value changes daily, and normally increases as the maturity date of the security instrument approaches.
Maturity Date	The date when the principal amount of a security becomes due and payable.
Par Value	Redemption value printed on the face of the certificate, the face value of a security as distinct from its market value.
Purchase Date	The date of the initial purchase of the financial investment.
Sold Date	The date the financial instrument is sold.
Yield to Maturity	Yield to Maturity is the current income yield minus any premium above par or plus any discount from par in purchase price, with the adjustment spread over the period from the date of purchase to the date of maturity of the bond.
