ISP Info

* ISP's are used for students enrolled in private school, 1st grade and over, but receiving speech services from the public schools.

* In EdPlan, an ISP is just like the IEP process with a few differences.
* To start go to IEP Process and go straight to Create Draft – For Meeting purpose, choose ISP
* Go through process as you normally would, but there will be NO accommodations or any state testing info
* Make sure on the services to page to add the related service of "transportation", then choose mileage reimbursement and it will be one round trip by parents. At the meeting you can ask if the parents want that service or decline. If they decline, just cross it out, have the parent initial and remove it from ED Plan before you finalize.
* Make sure to invite a private school representative. If they do not come to the meeting then document your attempts and what you did to make sure they are informed of the ISP.
