

# Have a balanced social life!

Always go to KIS events, there's truly not so many of them, and you WILL miss out a lot!

DO NOT let the homework pile up, especially the less significant one

Take the classes you are interested in, don't add extras that don't interest you

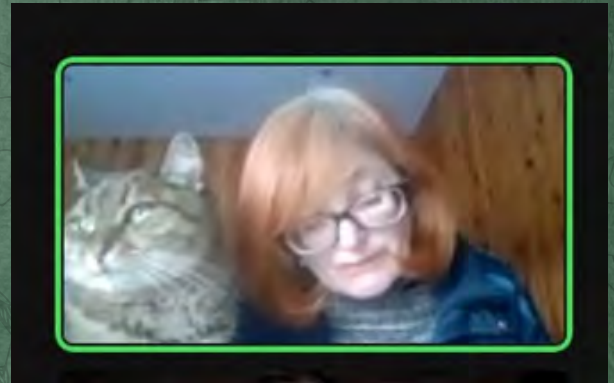

Study throughout the year, not the day before the test

Be nice to - yourself, people, your TEACHERS !!!  
(By doing so, you will gain a good reputation)

Don't be scared of teachers who seem scary (strict) at first, THEY ARE THE BEST

Find interesting parts in each class - it will help you focus and actually like what you're studying/succeed.

Don't take "easy" for granted

Challenge yourself academically and with extracurriculars  
(learn to balance challenge with ability)

Don't take on too many challenges at once - focus on managing your time well

"The good news is that we were able to solve the work-life balance problem for our analysts... with more work."
