## **Extra & Co-Curricular Discipline** **Off-Campus Behaviors - Addendum**

The language of the Student Code of Conduct as supported through District Policy #5310 clearly delineates the actions and disciplines associated to student behaviors on school grounds. This addendum is in support of these in that they address student actions off-campus and how discipline could impact their participation or standing in extra-curricular teams as well as co-curricular programs, clubs and organizations.

### **Any confirmed behaviors of the following will be reviewed by Building or District Administration and could result in disciplinary actions.**

1. Consumption and/or possession of alcohol.
2. Possession or use of drugs or other substances in an abusive manner.
3. Inappropriate conduct on social media.
4. Inappropriate or destructive behaviors that do not positively represent the school, club or community.

### **If any of the above actions are confirmed the following will take place:**

- a. Student and parents/guardians will be informed and apprised of their involvement and potential disciplinary actions.
- b. The degree of discipline provided by an administrator will be timely and specific to the incident. Potential disciplinary outcomes could include...
  - Loss of participation for a period of time from the team, club or organization
  - Loss of leadership role within the team, club or organization
  - Removal from the team, club or organization all-together
- c. A coach or advisor may choose to expand the extent of the discipline based on prior instances or specific expectations communicated to the students.
- d. An appeal process will be available to the student where they may request to meet with an administrator to discuss their status and implications associated to the inappropriate actions.
