Chromebook Initiative

Use these links to find information on what the initiative is, how Chromebooks are distributed, general use and maintenance info, filtering/safety information, and helpful training videos

High School: <https://sites.google.com/usd385.org/1to1/home>

Middle School: <https://sites.google.com/usd385.org/ms1to1/home>

Relay

From the Chromebook Initiative page: Access to the Internet using school-issued Chromebooks is also filtered through this same cloud-based filter service regardless of where the access occurs - at school, at home, or on any other network. Parents can sign up for weekly filter reports by visiting their school's website and clicking on the Parent Relay Sign-Up under QuickLinks.

*To sign up you will need to use your email that's connected to your student in PowerSchool, as well as your child's student email address.

Gaggle

In 2020, the district implemented a tool for real-time monitoring called Gaggle. Gaggle is an industry-leading, machine-learning technology that pairs with trained professionals to constantly evaluate student content (in grades 9-12) for potentially harmful content, emails, messages, documents, images, and more. If potentially objectionable content or a potentially harmful situation is discovered, Gaggle alerts school officials and assists them in the discovery process. Gaggle will be used in conjunction with your child's school Google account.
