

St. Michael-Albertville Technology Education & Engineering (TEE) Philosophy

Technology Education and Engineering emphasizes comprehension of the basic elements that go into any technology. The required elements of a comprehensive Technology Education and Engineering program include:

- Design process
- Development and production
- Use and maintenance of product
- Career exposure and exploration

TEE prepares students to make informed decisions to positively affect their personal and career lives to create a strong society.

Adapted from Standards for Technological Literacy (ITEA, 2007)
