New this year in Carbon County...

LCCC Jim Thorpe offers five new Associate Degree programs providing students with the opportunity to take their career to a new level. These programs offer in-demand technical skills training that can lead to employment in a high priority occupation. Students have the option in three out of the five new programs to earn a specialized technology certificate which prepares students for entry-level employment in the industry. Graduates of the Carbon Career and Technical Institute can take advantage of the existing articulation agreements with LCCC which may provide advanced standing in a technical Associate Degree program. LCCC also provides scholarship opportunities specifically for students entering our Technology programs.

- **Computer Science (A.S.)**
- **Construction Management (A.A.S.)**
- **Construction Technology (A.A.S.)**
- **Heating, Air Conditioning and Refrigeration (A.A.S.)**
