

Lehigh Area Elementary Center

1. Dr. McGalla and a team from Lehigh attended CLIU training this week on updates coming in the area of science. The team will meet with staff to share the new science standards and expectations.

2. Grade 2 read the biography of Helen Keller while learning about braille. A guest speaker came into the classroom to share her experiences as a person living with blindness. The students were able to ask questions and see examples of a person who can do everything we can do, too.
