

LEHIGHTON AREA MIDDLE SCHOOL

As the end of the second marking period draws to a close, the staff and students at the Middle School have been extremely busy. On Monday to Thursday, students alternated their mornings between taking the next round of CDT testing and also Winter Olympic Activities. For example a student may have completed a Math CDT on Monday, Olympic Activity Tuesday, ELA CDT on Wednesday, Olympic activity on Thursday and for everyone's hard work Friday afternoon we had a pep rally for our Winter Sports Athletes. It was also the final day for the Winter Olympics.

Our Olympic activities included a STEAM Activity of building, testing and creating the best ski jump to launch a ping pong ball the farthest.

We also played scooter hockey, curling with bean bags, Lego bobsleds, and short track speed skating using oversized socks. Each homeroom also had to create a bulletin board display with specific research topics about the country that their homeroom represents.

The Middle School has selected to do these CDTs and activities at the end of the Marking Period as it also allows 90 minutes per day to complete any missing assignments, or have remediation time, to help improve scores prior to the final marking period score being tallied.

These students were caught in the action of decorating the bulletin boards for the Winter Olympics.

Hockey is always a popular event during the Winter Olympics!

Students showing off their skills at the Curling Competition!

The Bobsled Competition is another popular event with students using their engineering skills to build Lego bobsleds to run the track.

Short Track Racing is a fun competition as you can see these students smiling while running the course.

These students are putting the final touches on their Ski Jump Tracks that they will use to run a ping pong ball down to hopefully have the longest jump.
