

LEHIGHTON AREA MIDDLE SCHOOL

The 7 White Team recently conducted a cross curricular activity dealing with Monarch Butterflies. The Science classes, Environment and Ecology and the English Language Arts classes observed the growth from chrysalis to adult butterflies. The students made scientific observations, recorded their observations and then wrote poems about the butterflies. The butterflies were then released in the Middle School Environmental Center. This project was coordinated by both Mrs. Beth Yescavage and Mr. Joe Yescavage.
