

Lehigh Area Middle School

The Middle School is hosting an activity day, here at the Middle School, on Tuesday, April 20, 2021. The purpose of this day is to reward all of the students and allow them to take a break from everything that has been occurring this year. The Student Council proposed an activity day where students have different options on what they could do relax and have fun. The options given were watch a movie, go outside for some activities, or play volleyball in the gym.

The entire student body was surveyed to see what most students wanted to do. Once this was determined, the team teachers surveyed their students to determine how many of their students wanted to do each activity. Based on this, each team then figured out how they wanted to run the activities for their time slots. Eighth grade will have their activities in the morning, during 1st and 2nd periods. Seventh grade will have their activities in the middle of the day, after 8th grade. Sixth grade will have their activities towards the end of the day, after all other grade levels. Each grade level will have roughly 1 hour and 40 minutes of "activity time" throughout the day.

The Student Advisory Council also has some other ideas moving forward now that the weather is nice as well. There will be more to come on those in the future. As always, our student council students have good hearts and great ideas!
