

PLEASE DO THIS FIRST!!!... RIGHT NOW, SO YOU DON'T FORGET!

All students must join:

The Summer AP chemistry canvas course

<https://jerichoschools.instructure.com/enroll/3YBJBD>

Hello and welcome to AP Chemistry one of the most challenging science courses you will take and love! I am very excited to take this journey with you! Be prepared to work, learn and have a little fun! For your summer assignment work, students are expected to do the basic introductory work *throughout* the summer to ensure your chemistry knowledge & skills are sharp & you are prepared for the rigorous pace of the AP Chemistry course. Please consider each assignment carefully and do your best to use the time in the summer to commit to memory any items that need memorization (solubility rules, polyatomic ions with charges, element names and oxidation states...). Also use the time in the summer to brush up on concepts that were shaky or rusty from first year chemistry so your time in class can be devoted to understanding, applying and mastering new and difficult concepts. This is especially important this summer after the last few difficult years. I have designed many lessons & activities to

help you be sure you are where you need to be in order to be prepared to start AP Chemistry & for the rigors of the AP Chemistry course. There are many ideas and material that we will NOT be reviewing during AP chemistry you will be expected to know things! The summer assignments are broken into weekly assignments designed to allow you the freedom to focus on small specific topics at a time. There are MANY **VARIETIES** of materials to be used for review, reteaching, practicing and quizzing concepts. There will be a diagnostic review exam in the first few weeks of class that will count as one of your first AP grades. You can do NOTHING or EVERYTHING and anywhere in between. *I can see the time spent online working to prepare!* Doing all work at the last minute will not be advantageous for you! You need to keep up and work consistently throughout the summer to be as prepared as you can be with the basics.

DON'T BE CONCERNED WITH GRADES ON SUMMER WORK! You do not have to get material correct... YOUR GOAL IS TO BE AS PREPARED AS YOU CAN FOR AP CHEMISTRY CLASS IN THE FALL!!! There will be a diagnostic quiz at the end of the summer to help you check and a review diagnostic exam to test your knowledge of materials learned in Regents Chemistry & material reviewed over the summer!

REMEMBER

all AP chemistry summer assignments will be listed on canvas and reminders sent out via remind. So.... join now if you did not at the start of this letter or you will miss out!

The complete summer assignment is attached BUT you must join the online classes with your jerichoapps email and using your full name to participate

PLEASE DO THIS FIRST!!!... RIGHT NOW, SO YOU DON'T FORGET!

All students must join:

The Summer AP chemistry canvas course

<https://jerichoschools.instructure.com/enroll/3YBJBD>

Go to canvas & join the following groups!

Did you Join the AP Chemistry Remind group ?

Did you Join the AP Chemistry Flipgrid group ?

Did you post your flipgrid intro video ♡ ♡

Did you Join the AP Chemistry EdPuzzle group ?

Did you Join the AP Chemistry Quizlet group ?

if you have issues or any question please email Mrs. Rinaudo trinaudo@jerichoschools.org

I will be holding an online information session with time for Q&A

for all students taking AP Chemistry next year on

Tuesday 6/27 @ 10:30am & Monday 8/29 @ 1:00pm via zoom

Did I mention ... YOU WILL HAVE TO WORK HARD!!!!

We cannot wait to meet all of you this fall!

Mrs. Rinaudo
