

CYBER SECURITY FORENSICS SPECIALIST 2023-24

Class Meets: Monday - Friday
Class Time: 8:00 am to 3:00 pm

Instructor: Aaron Nettles
1000 hours - 9 months

This program prepares students to track and patch security holes after an incident has occurred. Cyber forensic procedures may include seizure of equipment, analysis of confiscated materials and follow-up procedures relating to the incident. Students are introduced to basic security principles involving networks and operating systems, including the current threats, vulnerabilities and policies of electronic commerce. They gain an understanding of the principles of risk management, security architectures, incident handling, disaster recovery and secure systems administration. Students gain skills required for certifications in Comp TIA, Network and Security +.
