

SPECIAL TRIPS AND AWARDS FOR RECOGNITION OF OUTSTANDING ACHIEVEMENT

The Board encourages the students to participate in school related activities that result in the recognition of student achievement and distinguished service.

The Board is aware that financial assistance is always helpful and sometimes absolutely necessary if students are to attend special trips or receive awards for recognition of outstanding achievement. All requests for financial support of a special student activity or award will be given due consideration by the Board upon recommendation of the Superintendent.

The students involved in the special trip or receiving an award shall be encouraged to participate in fund-raising activities and, if necessary, the parents may be requested to supplement the cost of the activity.

If participation in a particular competition is an annual part of a program which may result in students winning the opportunity to compete at a State, national, or international level, an annual fund raiser should be planned and implemented. Funds not used in said year will be placed in the extracurricular account to be used in subsequent years.
