

The Clarkstown Central School District, as part of its ongoing programs, is providing you with important information concerning the use of pesticides in these facilities. The district uses, as its primary control method for dealing with pests, a technique known as Integrated Pest Management. This method of pest control involves using strategies other than pesticides, but they may be required in some situations.

Pesticides may be used periodically throughout the school year both inside the buildings and on the surrounding grounds. These applications, when required, will be made by certified individuals in accordance with label directions. Individuals that wish to be notified forty-eight hours in advance of a pesticide application should complete and return the attached form to the school district, indicating their desire to be on the notification list. Prior to any scheduled application, the representative, CCSD, shall provide notification to all parties on the list. This notification will supply information regarding the application, its location, the date of the application, material being applied, and how to obtain more information about the product. Should you have any questions regarding pesticide and the notification list, you should contact the Facilities Department at 845-639-6433 during normal business hours.

Clarkstown strives to provide a safe environment for all of our students, staff, and visitors and your time and attention in this matter are greatly appreciated.
