Family Input on Class Placement

Student _____ Current Teacher/ Grade _____

In the spring, classroom teachers, special educators, the Student Support Team, and administration work together to create class lists for the following year. We get input from support staff and specials teacher. Our goal is to place each child in a class where she/he feels confident and will grow academically and socially.

Student placement is a complex task that we take very seriously. We look at academic and behavior data, learning styles and social commotion strengths so that we can create a balanced group of learners.

You have received this Family Input Form because you indicated that you would like to share information about your child for us to consider in our decision making. This is an opportunity to share information or circumstances that you believe are important considerations to class placement. It is not a request for a specific teacher.

Return this form to our Family Community Coordinator, Darlene Sanborn, no later than Friday, May 20th.

1. My child works and learns best in an environment that offers....

2. My child's learning style can be described as.....
