

Roman Catholic High School Summer Science/Math Assignment 9th Grade (Class of 2027)

Dear Parents/Guardians,

In a couple of months, your sons will be starting their high school careers at Roman Catholic High School. Incoming freshmen will be rostered for either the math-based science course Physics First or Biology. In order to facilitate their transition to high school, ***all*** incoming freshmen will be required to complete a Math Readiness Summer Packet for their science course.

The attached packet is for students to complete over the summer and bring with them at the beginning of the school year. The packet is designed to help reinforce course material and help teachers of Science courses gauge their students' math ability as it relates to the Science curriculum. Students are to try their best and to note which material they are having difficulty with as well as material they have never been exposed to in grade school.

Instructions for Assignment:

- All work is to be completed on loose leaf.
- Final answers for each calculation problem should be boxed.
- Since each lesson in the course contains some kind of mathematical reference, this packet will be referred to during the entire school year. We advise all students to secure this packet.
- This packet is due to your son's Science Teacher by **Monday, September 18, 2023.**

Each section of the packet is clearly headed, followed by instructions, and a Khan Academy video explaining how to solve each problem or expression. For further clarification, you can create a Khan Academy account at www.khanacademy.org/math to view endless math equations, problems, and expressions. Additionally, to facilitate your son's ability to use the links, we have posted a digital copy of this document on our website. Please visit www.romancatholichs.com and Summer Assignments can be found under the "Academics" tab.

If you have any questions concerning this assignment, please do not hesitate to reach me at jcurry@romancatholichs.com or our Assistant Principal for Academic Affairs, Mr. Buck at academics@romancatholichs.com.

Best wishes for an enjoyable summer!

Mr. John Curry

- 11.) Dean ordered a set of beads. He received 70 beads, and 10% of them were orange. How many orange beads did Dean receive?
- 12.) The art club had an election to select a president. 9 out of the 12 members of the art club voted in the election. What percentage of the members voted?
- 13.) A school assembly had 30 students in attendance, and 20% of them were first-graders. How many first-graders were at the assembly?
- 14.) Brenda's Diner sold 10 milkshakes last week. 40% of the milkshakes had whipped cream on top. How many milkshakes with whipped cream were sold?
- 15.) At the sewing store, Ava bought a bag of mixed buttons. She got 21 buttons in all. 21 of the buttons were large. What percentage of the buttons were large?
- 16.) Ben earns \$12,800 a year. About 15% is taken out for taxes. How much is taken out for taxes?
- 17.) What percentage of 80 is 50? 18.) 20 is what percentage of 25?
- 19.) What is 60% of 0? 20.) Find 10% of the number 50.

Integers. Evaluate each expression.
