

Bike Program Conclusion

Our Kindergarten Learn to Ride Bike Program was a great success for our students but is coming to an end. Time flies when you're having fun!

BIKE LICENSE

At the conclusion of our program ALL Kindergarten students will be awarded an Official PCS Bike License, authenticated with an approval stamp, photo ID, License # and Expiration date.

EXPIRATION DATE: NEVER!

You will notice that your child's expiration date is NEVER!

Learning to ride is one of those rights of passage/ life skills that is often not lost once it is learned, yet only needs to be practiced to be maintained and mastered further. Bike Riding is a great lifelong physical activity for children and families and I hope you will encourage you child to continue.

STUDENT PROGRESS

Strider:

keeps feet in contact with ground for navigating, unsteady balance or confidence lacking.

Glider:

uses feet minimally/can navigate & balance for extended time without touching the ground.

Rider: can propel and navigate the bike with pedals and can stop safely.

At the bottom of your child's license there will be 3 check boxes that will indicate the level of progress your child displayed at the conclusion of the program. This is in an effort to communicate with parents and families just how far they have come as all children progress at a different rate and we have limited time together during the program. All students will be celebrated for their accomplishments and this info is simply to inform parents of each child's progress.
