

## Buildings and Grounds Meeting

October 8, 2018

6:15 PM

Attendees: Bill Berger, Roger Glidewell, Heather Mausteller, Sue Farr, Eric Stair, Ed Sanders, Kaitlin Rosselli, Cindy Jenkins

### Topics—

1—Elementary school playground—Discussed the quote from Seth Eyer for potential solution for the slope and drainage. Questions were asked about safety measures during the work, the size of bar grating in the quote, pipe placement, and the TSA materials. The team decided Brent will check with Seth about the safety measures and inquire about who is responsible for the purchase of the TSA materials. Bill shared that the grating size would not allow a student's arm to go through it. He also shared that a current pipe would be moved to a new location to help with the drainage.

There was also discussion about obtaining two additional quotes for comparison to determine if the project needs to be put out for bid. Team decided Brent will take care of this matter.

2—Bees on playground and in stadium—It was shared that Brent is aware of them and sprayed both areas.

3—Buddy Bench—It was shared that Brent is aware of its condition.

4—Digital sign—It was asked if it could be lowered.

Adjourned 6:37 PM

Respectfully submitted

Cynthia Jenkins
