Classroom and Fieldtrip Volunteers
TB Risk Assessment and TB Skin Test

California law requires that school volunteers providing transportation on fieldtrips and/or working with children in classrooms be free of infectious tuberculosis (California Education Code, Section 49406 and Health and Safety Code, Section 121525). Both the TB Risk Assessment Questionnaire and the TB Skin Test must be administered by a healthcare provider (physician, physician assistant, nurse practitioner, or registered nurse).

Recent changes in the law now state that the Risk Assessment Questionnaire will replace the traditional TB Skin Test for all volunteers and if risk factors are identified, would then require TB testing and examination to determine if the person is free of tuberculosis.

Moving forward, Hidden Valley Elementary School will accept proof of both the TB Risk Assessment Questionnaire and the TB Skin Test. Each of these documents is valid for 4 years. The state is expecting this change to be more cost-effective, while still protecting our teachers, volunteers, school employees, and children from tuberculosis.

Please submit your proof of TB Risk Assessment Questionnaire or TB Skin Test as soon as possible if you plan to volunteer in your child's classroom. Should you have any questions, please contact our Health Tech, Lisa Phillips, at 707-890-3925 or email her at lphillips@srcs.k12.ca.us

Please detach and return to school with test results. Please put in the "TB Skin Test" Box in the main office. Thank you!
