OPTIONAL READING RESOURCES

Book Lists

Students in intermediate and middle school grades may need assistance with book choices. Parents are always the first teachers and can use the information on this document to aid in selections. Summer reading should be books that are close to the reading level of the child and are intended to maintain and challenge skills while providing conversation starters. As you select a book, please understand that every book is not the best choice for every student. If a book is unappealing or offensive to you in any way, please choose another book.

Newbery Award - Newbery books (both winner and honor) are selected for their literary merit by a select committee of librarians and educators. This award home page from American Library Association has the newest winner and runner up books as well as those lists back to the origins of the list in 1922. This group of books is ideal for intermediate and older students since most are chapter books with some length.

Books at a VERY low Price!

[Book Outlet](#) - This online outlet sells new books (with small defects) for very good prices. Most of my classroom library books come from this online store. I've been very impressed with the quality of the books I've received. - Mrs. Perkins Ms. Lamb uses this company for library books too!
