

Chromebooks

A Chromebook is a laptop of a different breed. Instead of Windows or Mac OS, Chromebooks run Google's Chrome OS. These machines are designed to be used primarily while connected to the Internet, with most applications and documents living in the cloud.

What is a Chromebook?

- a fast way to access the internet
- a portal to the web
- a type of laptop that runs only **Google Chrome Browser**

What is it not?

It is not a netbook.

It is not an iPad.

There are no programs, no Microsoft Office

It is not a place to store files.

It is not a device to run CD's or DVD's.
