Jesus wants to pursue a career in the technology industry, starting as a computer technician, but he is also interested in software/hardware engineering.

## Cool Tool

Canva's App for Social Media provides fresh templates for all social media platforms. Everything from Insta Stories to YouTube channel art, Canva has templates to make you and your brand stand out. Download the app for quick photo edits and template input. Check out the Canva Design School for more information and tutorials!

See Mrs. Lakdawala (East) & Mr. Gilliam (West) for more information on our Marketing Classes!

## Career Corner

### Accounting: Digital Risk Analyst

The field of accounting is vast. It isn't about math or just staring at a screen, its about solving business problems and decision making. It is a field that has consistent needs and is ever-evolving, especially with the use of data and technology. The role of an accountant can vary by company, Companies like PricewaterhouseCoopers (PwC) offers a range from tax and audit to risk analysis and consulting services.

West Leyden Alumna (Class of 2015), Yaritzza Velasquez, is doing just this for PwC. Having

earned her bachelors degree in Accounting & Information Design Sciences (& currently prepping for her CPA), Yari started with PwC as an intern. Her role now is split between audit support and client consulting, creating data process improvement dashbaords using visualization tools like Tableau & PowerBI. While attending Leyden, Yari took Accounting, Adv Honors Accounting and Independent Study Financial Accounting.

## TSI Tech Tip

Clearing your browser history can eliminate many browser related issues. Click on the three vertical dots in the upper right hand corner > settings > privacy and security > clear browsing data > clear data
