

# How to Connect to DUSD Network

Please read this message to understand the wireless connections for our District through SafeConnect. SafeConnect manages wireless authentication to the Dinuba USD wireless network. This is important to help us maintain a secure wireless network for the district.

We have four Wireless connections in our district:

WIRELESS SSID	USERS TO USE THIS WIRELESS	LOGIN INFO NEEDED
DUSD_CB	This is only for ChromeBooks	None – configured through Google management
DUSD	Staff	Network Login ID/Password
DUSD_Guest	Visitors, consultants, trainers, etc.	Users will need to provide personal email/cell #. Login information will be sent to users
DUSD_Students	WIS/DHS/SV Students	Students can authenticate with google drive Login ID/password

Once you connect to one of our wireless networks. You will need to open your internet browser. You will be directed to:

<https://safeconnect.dinuba.k12.ca.us>

If you are not automatically directed, you can manually type the safeconnect web link in your browser and the following window will prompt:

Sign In

Network Username

Password

I accept the Acceptable Use Policy

Sign In

For DUSD, once you authenticate, you will have access to the wireless network. If you experience issues, try re-starting your computer. This helps to synchronize your computer to the authentication server. SafeConnect requires for wireless devices to re-authenticate. We have setup the DUSD re-authentication for every 90 days (3 months). This means that every 90 days, you will be prompted to sign in with your Network Login ID/Password. The 90 days count down start when you first authenticate your wireless device.

**Please make sure you connect to DUSD. If you used any of the other Wireless SSID, you will have issues connecting back to DUSD and will need to contact IT to resolve the issue.**
