

- Earth pin must not have a plastic sleeve
- All travel adaptors must have a fuse
- If the plug looks smaller than normal the L/N pins may be too close to the edge
- There must be plastic shutters covering the line/neutral sockets. You should not be able to see metal
- It should not be possible to plug the centre earth pin into any other holes on the socket

- Fuse is fitted (some are integrated) ✓
- Earth pin is all metal ✓
- Line/neutral contacts are protected by shutters ✓
- British standard (BS) is clearly marked ✓
- There is no CE mark (travel adaptors should conform to British, not European standards) ✓
