This report provides the detailed results for each question from this school/district's 2017–2018 *California Healthy Kids Survey* (CHKS), presented in tables organized by topic.

The CHKS, along with its two companion surveys—*California School Staff Survey* (CSSS) for staff and the *California School Parent Survey* (CSPS)—is a service of the California Department of Education (CDE). These three surveys form the *California School Climate, Health, and Learning Survey* (CalSCHLS) System, the largest, most comprehensive state effort in the nation to regularly assess students, staff, and parents at the local level to provide key data on school climate and safety, learning supports and barriers, and stakeholder engagement, as well as youth development, health, and well-being. Exhibit 1, at the end of the Preface, presents the major school-related domains and constructs assessed by CalSCHLS at the elementary level.

These surveys grew out of CDE's commitment to helping schools promote the successful cognitive, social, emotional, and physical development of all students; create more positive, engaging school environments for students, staff, and parents; and ensure college and career readiness. They provide a wealth of information to guide school improvement and **Local Control and Accountability Plan** (LCAP) efforts, particularly in regard to the state priorities of enhancing school climate, pupil engagement, parent involvement, and addressing the needs of vulnerable groups.

Factsheets, guidebooks, and other resources to help in understanding and using CHKS results are available for downloading from the survey website (chks.wested.org), including Helpful Resources for Local Control and Accountability Plans (chks.wested.org/resources/LCAP_Cal_SCHLS.pdf). The California Safe and Supportive Schools website (californias3.wested.org) provides information and tools helpful in implementing effective strategies to address the needs identified by the survey.

The CalSCHLS Technical Assistance Center offers a Data Workshop to help identify local needs and develop action plans to meet those needs (see below).

THE SURVEY

The California Department of Education (CDE) has funded the CHKS since 1997 to provide data to assist schools in: (1) fostering safe and supportive school climates, social-emotional competencies, and engagement in learning; (2) preventing youth health-risk behaviors and other barriers to academic achievement; and (3) promoting positive youth development, resilience, and well-being. A thorough understanding of the scope and nature of these student behaviors, attitudes, experiences, and supports is essential for guiding school improvement and academic, prevention, and health programs.

The CHKS is not just a standalone instrument but a data collection system that districts can customize to meet local needs and interests. The elementary-school CHKS consists of a required general Core Module and a series of optional, supplementary topic-focused modules, including a Social and Emotional Health Module (SEHM), that districts can elect to administer. Districts may also add their own questions of local interest in a custom module. Table 1 indicates the modules administered by the district/school.

Core Module

As outlined in Exhibit 1, the Core Module consists of key questions, identified by an expert advisory committee, that are considered most important for schools to guide improvement of academic, health, and prevention programs and promote student achievement, positive development, and well-being. The primary focus of the survey is assessing student perceptions and experiences related to:

- School climate, connectedness, and learning engagement;
- Perceived school safety and frequency of, and reasons for, harassment and bullying at school;
- The level of which students experience developmentally supportive caring adult relationships, high expectations, and opportunities for meaningful participation at school, three fundamental developmental supports (protective factors) that promote positive academic outcomes;
- Supports for social-emotional learning and positive behavior; and
- Health-related and behavioral learning barriers (e.g., substance use, violence at school, physical health, mental health).

What's New? For 2017-18, the only changes to the survey are the following improvements:

- A new question on the frequency of school attendance;
- An expansion of the scale asking about opportunities for meaningful participation in the school;
- An expansion of the existing marijuana use question to refer to eating or drinking it as well as smoking; and
- A new question on attitudes toward e-cigarette use.

Supplementary Social Emotional Health Module (SEHM)

The SEHM greatly enhances the value of the CHKS as a strength-based assessment of positive emotions, engagement, ability to build and maintain relationships, and other social-emotional competencies linked to student mental health and well-being, academic success, and college and career readiness. It includes 35 items that capture the totality of core adolescent psychological assets.

SURVEY ADMINISTRATION AND SAMPLING

School staff administered the survey, following detailed instructions provided by CDE that were designed to assure the protection of all student and parental rights to privacy and to maintain confidentiality. Students were surveyed only with the consent of parents or guardians. Student participation was voluntary, anonymous, and confidential.

- Table A1.1 gives the target sample of students and the final number and percent of students who completed the survey (the participation response rate).
- The Appendix lists all the secondary schools in the district that were eligible to participate in the survey and the percentage of students enrolled in each of them that completed the survey.

THE REPORT

The survey results are reported in tables, organized by topic, that provide the percentages responding to each question response option by grade level. Because it is just as important to identify the positive behaviors of youth as it is to identify the risks they face, the tables reporting risk-behavior data include the

percentages of youth who responded negatively (did not engage in the behavior). Percentages are rounded off to the nearest whole number.

UNDERSTANDING AND USING THE DATA

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results. The following are a few of the key issues that should be kept in mind. A more detailed discussion of these topics can be found in the CHKS Data Use and Dissemination Guidebook (download chks.wested.org/resources/chks_guidebook_3_datause.pdf).

Sample Characteristics

Among the most important factors affecting the quality of survey results is the level of student participation. The validity and representativeness of the results will be adversely affected if the student response rate is lower than 70%. Even if the response rate is low, the results provide an indication of what those students who did respond felt about the school and their experiences and behavior.

Changes Between Survey Administrations

Many factors besides real changes in behavior, attitudes, or experiences among students may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or size of the sample of students who completed the survey, changes in the questions themselves, or differences between the time periods in which the survey was administered (e.g., some risk behaviors tend to increase as students age, or may increase during holidays or social events).

RESOURCES

The CHKS website contains numerous guidebooks and other tools for using and understanding survey results.

- *CHKS Guidebook to Data Use and Dissemination* provides step-by-step instructions on how to interpret survey results and effectively disseminate them (download chks.wested.org/resources/chks_guidebook_3_datause.pdf).
- CHKS factsheets (chks.wested.org/using-results/factsheets) analyze key topics at the state level, show how data variables are related, and offer suggestions for how data can be analyzed at the local level.
- *Making Sense of School Climate* provides a discussion of all the CalSCHLS survey items that relate to school climate (download californias3.wested.org/resources/S3_schoolclimateguidebook_final.pdf).
- *Helpful Resources for Local Control and Accountability Plans* (chks.wested.org/resources/LCAP_Cal_SCHLS.pdf) describes how survey items align with LCAP priorities and indicators. Also available is an LCAP-related PowerPoint presentation (chks.wested.org/training-support/workshops-presentations).
- The *School Climate Connection Newsletter* provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on the CHKS or CaliforniaS3 websites.
- CDE's **California Safe and Supportive Schools** website (CaliforniaS3.wested.org) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.

NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process of continuous quality improvement. The following describes some followup steps you should take and some custom services (additional fees apply) available from the CalSCHLS TA Center to help in fostering effective use of the results and provide additional information to support school and program improvement efforts and the LCAP process.

Engage Students, Staff, and Parents in an Action Planning Process

First and foremost, engage students, staff, parents, and community stakeholders in reviewing and exploring the meaning of the results and obtain their input into how the school might better meet the identified needs and into the development of a detailed action plan. This communicates to stakeholders that you value their input into how to improve the schools and gives them an opportunity for meaningful participation. This helps enhance pupil engagement and parent involvement, two LCAP priorities. Their input, in turn, will help in identifying school needs and developing an effective response. It will also promote higher rates of participation the next time the survey is administered, as stakeholders will see how the data has been used for positive purposes.

Compare Results with Other Data

The value of your CHKS results will be greatly enhanced if examined in the content of the following sources of related data.

- **Staff and Parent Surveys.** The results of this student survey should be compared to those obtained from the CalSCHLS surveys of school staff and parents. It is important to determine how consistent are student, staff, and parent perceptions and experiences. If you did not administer these companion surveys, consider doing so next time.
- **Secondary School Results.** The elementary results should also be compared to the middle and high school results to determine how student strengths and needs develop with age. In particular, results from middle school can help guide engagement, prevention, and health promotion efforts for elementary students that might mitigate future problems when they transition into middle school. Vice versa, making middle schools aware of the results from elementary schools may help them better prepare for future challenges they may face.
- **Other Data.** CHKS results will also be enriched if analyzed in the context of other data typically collected by schools that relate to the variables assessed. For example, are the data self-reported by students consistent with what you know from discipline referrals, school vandalism costs, and behavioral observations in classrooms.

Data Workshop

To assist in your review of the survey results, you can request the CalSCHLS TA Center to conduct a structured, customized Data Workshop. In this workshop, a survey specialist works with district stakeholders to promote better understanding of the results and to identify local needs that need to be addressed. The workshops can also include engaging stakeholders in developing a detailed Action Plan and timetable for meeting those needs using evidence-based strategies.

For more information, contact your CalSCHLS TA Center (call 888.841.7536) or email schoolclimate@wested.org.

Request Additional Reports and Data

As you review your data with stakeholders, you may find that additional data needs emerge. The following custom services (additional fees apply) are available through the CalSCHLS TA Center to help delve more deeply into your survey results and foster more effective use of the results in support of school and program improvement efforts and the LCAP process.

School Reports

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school (a fee applies).

Disaggregated Report

The staff of the Regional TA Centers can produce reports that show how results vary by subgroups. For example, what are the characteristics of youth who are low in perceived safety, school connectedness, or academic motivation compared those who are high? This is particularly important given the LCAP requirements to address these needs. This helps in understanding the meaning of the results and developing interventions that target groups most in need.

Analyze Dataset

The complete dataset is available electronically for additional analysis (there is a small fee for preparation). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different subgroups of students and across schools within a district. You can also request an analysis from the CalSCHLS TA Center as a custom service.

Add Questions to Your Next Surveys

Determine what additional information is needed to guide school improvement efforts and add questions to your next CHKS, staff, or parent survey. All three surveys are designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.
