Appointment of **James O'Hagan**, District, Director of Facilities III, effective on or before 10/6/2014	Approved

Committee Reports

Audit Committee - Have not met since our last board meeting
Facilities Committee - Last meeting was on the 5th. High school lockers are ready and locker room floors should be done. Landing boiler electric to be hooked up and will test during off school hours. Custodians will be trained on the boiler unit.
Policy Committee - Trustee Nedbor-Gross presented the board with a hand out of policies that were revised, reviewed and policies to be reviewed and considered for review. Per the Board president a copy of this list should be placed on the website for our community to view. Committee met on September 9th. Additionally, the technology committee will be involved in some aspects of this committee when it comes to the technology based policy issues.
Technology Committee - Met and was a good start. As a brand new committee they realized that they want to grow the committee and are looking to involved some community members and staff. Dr. Israel stated that they are expanding the group. We did an education technology profile survey of staff at the elementary, middle and high school levels to give us some insight. We're going to be visiting Apple Education, which is a briefing executive session on October 8th. There will be members of the administrative staff, teaching staff as well as board members joining them. So that they can really look at the beginning states of forming a strategic plan for where we can move in technology. There is also the Long Island Tech Summit on October 21st. We think why just reinvent the wheel. Let's also see what other people are doing and also learn from their progress and their mistakes.

Superintendent's Report

It's been a busy couple of weeks with influx of new students registering in the end of August and people still registering from K-12. A recent Newsday article with a misunderstanding of information that we had 30 new unaccompanied boarder children, that was not accurate. The newspaper reporter had asked me if we had an influx of students that had ESL needs and I said we were pretty consistent year to year as to the number of new students that we get with both ESL needs and without, so our enrollment is pretty consistent and at this point in time we had about 30 new students. He kind of rolled it all into one particular paragraph and made it sound like we had 30 unaccompanied minors coming into the district. We didn't have any of those. Thanked all the building staff across the district. The buildings look wonderful thanks to the custodians. They have done a great job with the of things they had for projects through the summer getting the buildings ready before the start of school. The teachers came in and got their classrooms ready and inviting for students. As a district we worked collaborate together to ensure that we had a smooth start to the school year. Most of our students are in classes although I did see a couple of registrants coming in today as well. Had a number of new people coming into the district and less going out of the district and that is always wonderful to hear. Looking forward to an exciting school year filled with all the things that enhance our children's experience. Additionally, there will be additional information

posted on our website as well as part of the school messenger call to you reminding you of board meetings. The additional piece of information will be a list of projected presentations that will be happening through the school year so that you will know in advance the actual agenda being posted that we will be doing as promised a follow up to the summer of success program that we had at the middle and high schools. We will also be looking at state assessment scores, the impact of those and how the state continues to fail to understand how to use them. We will have updates all through the school year and different things posted so that community members will make plans accordingly to come to our board meetings and support our presentations and our students.

Business Affairs - Operations
