Dangers of VAPING MARIJUANA

Vapor is NOT SAFER!
Just because it's vapor doesn't make it safer. The harmful chemicals in marijuana are still released when vaped.

If it's legal it's safe, right?
Many substances are legal but that does not mean they are safe. Marijuana has many negative side effects. Marijuana is not legal in all states.

Legalization and Effects
States that have legalized the use of marijuana have seen a recent increase in accidents. Drugged driving deaths spike with the spread of legal marijuana.

SIDE EFFECTS

Decline in IQ
Impaired Thinking
Addiction
Relationship Problems
Financial Difficulties
Brain Health Decrease
Weakened Immune System
Impaired Coordination

Memory Loss
Anxiety
Panic Attacks
Hallucinations
Increased Heart Rate
Increased Risk of Heart Attack
Increased Risk of Stroke

TEENS VAPING AND MARIJUANA

WARNING SIGNS:
Dilated Pupils
Blurred Vision
Lack of Motivation
Constant Hunger

EFFECTS OF MARIJUANA ON TEENS:
Difficulty with critical thinking skills
Impaired reaction time
Decline in school performance
Increased risk of mental health issues
Higher chance of addiction.

Marijuana is a gateway drug.
The THC levels in vaped marijuana is almost 4 times higher than when smoked. Marijuana leads to addiction, hard drug use, and bad decision making.

DAILY MARIJUANA USE:
0.7% 3.4% 5.8%

1.7 MILLION TEENS have vaped marijuana

WHAT'S IT REALLY COST?
CRIMINAL CHARGES
POSSIBLE PENALTIES:
FIVE YEARS IN PRISON
FOR EXAMPLE:

INHALING POISON

TOXIC METALS
The heavy metal, lead, of aerosolized cannabis, lead of exposure to lead. It's a neurotoxin that can lower IQ, lead to illness, and even death.

HIGHER THE LEVELS
When vaping marijuana, the THC level is almost double that of when smoked. The level of exposure to lead is 10 times higher than when smoked. It's a neurotoxin that can lower IQ, lead to illness, and even death.

SOME VAPE PENS contain harmful additives. Some vape pens contain additives that are harmful to your health. These additives are generally not regulated by the U.S. Food and Drug Administration (FDA). These additives can cause lung damage and other health issues.

BOX MOUS Box mous pens are the most popular type of vape pen. They are often found in schools and are easy to use. They are also the most dangerous type of vape pen. They contain the highest levels of THC and are often found in schools and are easy to use.

WEEB VAPOR Weeb vapor pens are the most popular type of vape pen. They are often found in schools and are easy to use. They are also the most dangerous type of vape pen. They contain the highest levels of THC and are often found in schools and are easy to use.

THE POISONS
There are still risks when you inhale when vaping marijuana. The heavy metal, lead, is released when you inhale. It's a neurotoxin that can lower IQ, lead to illness, and even death.
