

HOW TO:

INSTALL SECURE WEB BROWSER ON YOUR MAC DEVICE

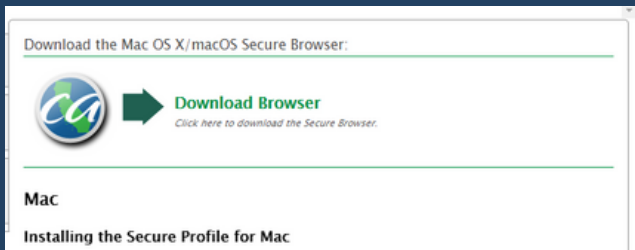

1. Open any Web Browser and search "CAASPP Secure Browser". Select the first site (ca.browsers.airast.org)

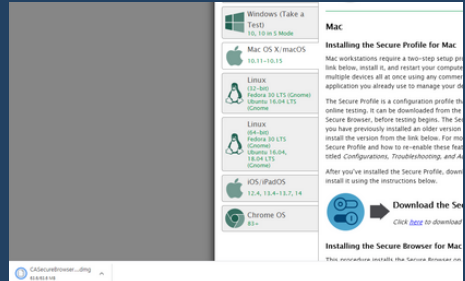

2. Scroll down to section "Download Secure Browser". Select the option Mac OS X/macOS.

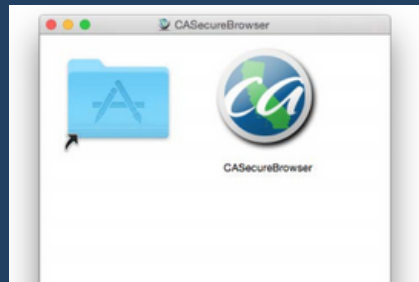

3. Click on "Download Browser"

4. The file will appear in the bottom left. Begin the download and install by clicking on the file

5. The file will open and automatically begin installing. As an option, you can drag the secure browser (CA circle icon) into the applications folder.

6. Once it's complete check for the CA Icon on your desktop or dock (bottom bar).
