According the Environmental Analysis (Transportation), the Study Area Intersections are purported to be representative of the other intersections within the study area that weren't analyzed. How is it possible that you can extrapolate data from one intersection to another? What is the basis of this representation?
Every intersection counts!!

As a parent, I fully support the advancement of Wedgeworth. The school district is doing the right thing by making much needed improvement starting w/ Wedgeworth that witness increasing enrollments. It is sad to see some for profit entity ~~app~~ who profited out of school district property opposing such project.

I am a student at Wilson High School. Why not use all the money to fix all schools in our district? There many needs, like flooding. Why is that a problem? Today is Tuesday, it rained on sunday and areas are still full of water. RESTROOMS — Why are so many closed? Drinking fountains there are many options out there — Why do our schools have fountains you can't drink out of?

Wedgeworth Dr. is naturally just a 2 lane street and is surrounded by residential areas, technically it is a small community built around the school, it is a great idea to just keep the school and make the school better and nicer. Baseball should be developed in a different recreation area.

We understand resident's NOP written comments summory are mostly concerning relocating of baseball field and traffic congestion on Wedgeworth dr. and nearby streets. Wouldn't it be a better idea to separate baseball traffics from school traffic by relocating baseball to a Steinmetz park ?
Where Stimson street is a 4 lane traffic road and much wider than 2 lane Wedgeworth dr.
And Steinmetz park has plenty nearby parking to attract

If Wedgeworth has a K8 school and can enroll 1200 students,
which is quite a small capacity, Wedgeworth currently has 594 students,
anticipated 675 students in 2020, 750 in 2021,
Does Wedgeworth K8 have enough rooms to take all of its elementary students ?
Or does Wedgeworth need to send out some of its students to nearby middle schools ?
