

Public Wireless

1. Connect to the **DC-Guest** wireless network
2. Open a new browser window if one does not open automatically. If the page does not automatically load, visit any other webpage (e.g. cnn.com). Note for Chrome devices, if the page comes up as untrusted or not private, navigate to the bottom and select **Advanced** and **Proceed to...** to continue.

3. Click Accept and Continue to accept the Terms and Conditions to begin browsing the Internet.
4. Open a browser and type **Securly.com/SSL**. Click on the large icon that displays your operating system to download the certificate. Follow the prompts to install the Securly Certificate. Installation of the Securly certificate may be required for some sites when using Chrome browsers.
