

ELEMENTARY STUDENT PLACEMENT: 2214P

General placement guidelines for elementary students in the Federal Way School District are to provide equalization of school and District class size; focus on a balance in each class of girls and boys, students' academic abilities, their social/emotional adjustment, their study habits and learning styles; and to allow for separation of specific students.

Special considerations may be given to the implementation of the general placement requirements by the building principal for individual students who, in the principal's judgment, or the judgment of the parent/guardian, require special placement because of unique needs and where such special placement is consistent with the educational needs of the larger student community. Examples of students who might be eligible for special placement considerations are students with a handicapping condition; students with a professionally-documented academic need(s); students with a professionally-diagnosed emotional or behavioral adjustment problem, and/or other significant educational needs as identified by parent(s) or guardian(s).
