

CATHETERIZATION: 3417

The District authorizes that qualified staff provide for clean, intermittent bladder catheterization (CIC) of students or assisted self-catheterization in conformance to rules adopted by the State Board of Nursing.

Employees who are not licensed nurses and whose job descriptions do not require performing catheterizations may file a written statement of refusal to perform catheterizations. Refusal will not adversely affect the employees job status or be grounds for dismissal.

Catheterization is permitted under the following conditions:

- A. A parent, legal guardian or other person having legal control over the student file a written, current and unexpired request that the District provide for the catheterization of the student;
- B. A licensed physician of the student file a written, current and unexpired request that catheterization of the student be provided for during the hours when school is in session or the hours when the student is under the supervision of school officials;
- C. A registered nurse provide written, current and unexpired instructions regarding catheterization which states which staff members are designated to provide for catheterization and a description of the nature and extent of any supervision that is required;
- D. A staff member who is authorized to provide for catheterization must receive training from a licensed registered nurse consistent with the rules of the State Board of Nursing. Licensed practical nurses are trained to provide catheterization as part of their professional preparation and are not subject to this training requirement;

Procedures regarding the provision of catheterization, and the training and techniques required for the implementation of catheterization shall be in accordance with the State Department of Health rules and as stated in the District Health Services department procedures.

The District and its staff and the staff member who provides for catheterization in substantial compliance with this policy and the rules of the State Board of Nursing shall not be liable in any criminal action or for civil damages arising from providing catheterization. The District may discontinue catheterization service for a student without being liable so long as the affected parents/guardians are given advance oral/written notice.
