

SCHOOL OF PETROLEUM & NATURAL GAS

ASSOCIATE OF SCIENCE DEGREE AND CERTIFICATE PROGRAMS

The associate degree and certificate programs provided by Lackawanna College's School of Petroleum & Natural Gas (PNG) directly answers the petroleum and gas industry's need for a trained workforce. Graduates are ready to work as soon as they reach a job site. Seventy percent of graduates are hired by major E & P, Midstream, and Pipeline companies each year.

Learn from dedicated administration and faculty who have both the academic credentials and industry experience needed to train the next generation of gas industry employees. The curriculum is built on engineering principles and industry direction to close the gap between certificate and AAS Vo-tech programs and petroleum engineering programs. Courses are available at our Tunkhannock Center or online!

ASSOCIATE DEGREES

PETROLEUM & NATURAL GAS TECHNOLOGY

Train for a career in one of the most in-demand fields in the commonwealth. Employers across the United States are looking for lease operators, field technicians, or operations techs in a midstream environment. You'll explore a career as a problem solver in an environment that will allow you to maintain facilities and equipment, troubleshoot obstacles on the job site, and operate within the safety standards that are agreed upon across the industry.
