

The Freudian Approach to Psychological Criticism: **The Monster's Psychological Development**

Write an essay (1000 to 1500 words) answering the following prompt. Your essay must include a clear thesis, a formal, academic tone, correctly blended and cited textual evidence, and a works cited page. Also, to avoid plagiarism, the initial draft of this essay must be written/typed during class over the allotted days—so get to work.

How does the monster's psyche, including his three Freudian psychic zones, develop over the first years of his existence? Once they are developed, what psychic zones predominantly drive or influence his actions, at what stages of his journey, and why?
