

SCHOOL FACILITIES: 6902

The District is committed to preserving the District's facilities in a safe, healthful and educationally effective manner that is compliant with applicable codes and requirements. The Superintendent/designee shall oversee the development of an Asset Preservation System (APS) that is compliant with all requirements of the Asset Preservation Rule (APR).

The APS shall provide for the preservation of District facilities by employing a system of processes that includes, but is not limited to, the following components: predictive and preventative activities, repairs, educational specifications, maintenance, and reconditioning.

The APS shall also include a yearly evaluation process to comply with the requirements that facilities sustain their expected life cycle. An APS shall be implemented in all facilities constructed or modernized with State matching funds after 1993/1994, within eighteen (18) months of the Asset Preservation Rule adoption.
