

MVHS INNOVATION SAMPLE PATHWAY

I like music and video games. I might be interested in coding. I have a couple of friends at school, but I don't like big groups. I think I'll start with computer science.

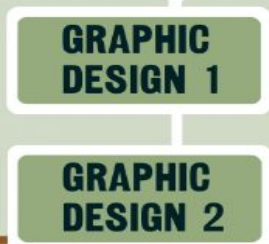

The next class in the pathway is an AP class, and that scares me. I think I'll try music composition

I've been pretty successful at MVHS, so I think I'll try the AP class now so I can get to game programming

I love programming. I think I might want to design games for a living. What else would help me in this field?

The music composition pathway was cool. I want to learn more about music.

I love making music but I still may go with something like software developer. My data science teacher told me about the Discrete Math class that might help me think through patterns

SOCIO-POLITICAL ROCK & ROLL

What if I want to start my own business later?

To: Community College first
Major: Software Engineer
Training: B.A. needed
Growth in SD: 11%

Wages:
 \$120k ~avg.

I know I'm going to head to community college first, so I let my counselor know that I want to graduate a semester early

WHERE WILL YOUR PATH LEAD YOU?

Mission Vista High School students will choose **17** classes in addition to the **15** required classes
