What Is a Map?

Look at these maps to explore the locations of different types of land and bodies of water.

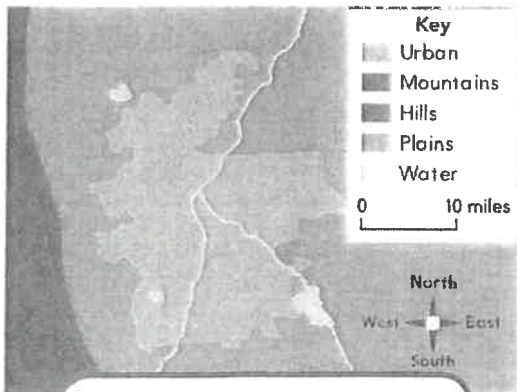

Explore online. 

United States

California

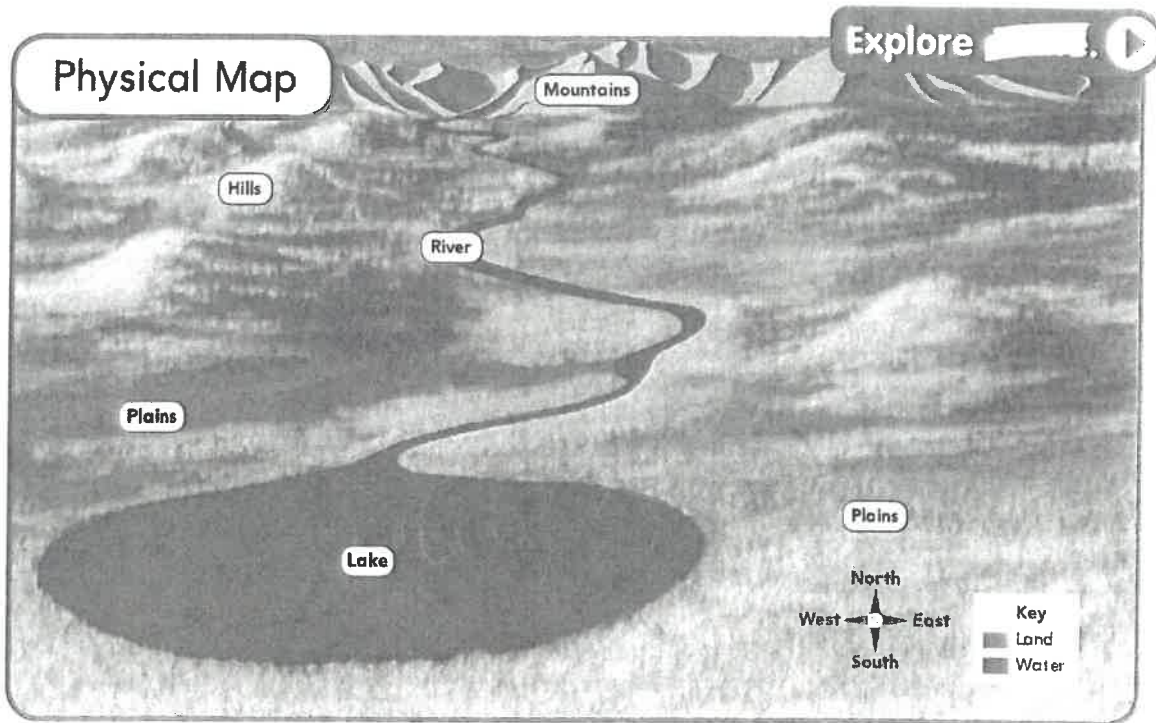

Denver, Colorado

A **map** is a drawing or a model of a place. It also shows the distance between two places. Some maps show the shapes of land and bodies of water in a location.

 How can you use this map of the United States?

Why We Use Maps

Look at this picture to explore a map.

Can you find the land on this map? Can you find the water?

Can You Explain It?

 What can you find out by exploring a map?
