

AVID at JMMS

AVID is a middle school elective class for 7th and 8th grade. AVID's mission is to close the achievement gap by preparing all students for college readiness and success in a global society.

Check out a few of the MANY benefits of AVID!

1. Academic Skills

AVID teaches students academic skills related to writing, inquiry, collaboration, organization, and reading. Students work with college tutors twice a week on current class work. Students also benefit from peer support

Students learn about different post-secondary opportunities (university, study abroad, trade school, community college, etc). They learn about scholarships, specific degree programs, and more. Students also research careers of interest in depth

2. College & Career Knowledge

AVID brings in a plethora of guest speakers from different careers and college experiences to inspire students in their own future college and career endeavors. Students also go on field trips to local colleges to reinforce their learning

3. Guest Speakers & Field Trips

Students learn how to take agency and take charge of their own education. They complete self-selected projects, lead activities, participate in games, help at school events, and build positive relationships with like-minded peers

4. Student-Centered Learning

Ready?

To join AVID, go to the JMMS school website for more information and the application!
