When placement is not clear, a teacher’s professional judgment based on their classroom contact with a student over several months should be used for making recommendations. No subjective recommendations are used to change a student’s placement to a lower math course than performance data indicates.

Students will be assessed at least once during the first month of 9th grade to ensure accurate placement in their Mathematics course.

A parent or student may appeal math placement by contacting the student's counselor.

A grade of F in any semester prevents a student from moving to the next class in the sequence. A grade of C or higher is required for UC/CSU admission. Students planning to attend a UC/CSU or other four-year university may need to retake any course in which they receive a D or F.
