

College Connection

Our College connection with the neighboring Moorpark College, as well as other colleges and universities, provides our students with real opportunities to interact with and learn from college professors and students. Our partnerships with area colleges and universities enrich and reinforce grade-level standards with up-to-date best practices. It also instills in our students the concept of lifelong learning. We expect that every Campus Canyon Academy student will attend college and each will achieve at a level of academic performance that enables them to succeed at the nation's best high schools and institutions of higher learning.

Transitional Kindergarten

The Transitional Kindergarten program is an alternative program that provides an additional year to develop kindergarten skills. The program is limited to specific age requirements. Please contact the office for more information.

Campus Canyon College Preparatory Academy

**Where a child's full potential is
developed through highly
challenging activities to promote
each student's gifts and talents.**

Our Unique Approach to Learning

Academic Focus

Schoolwide Enrichment Model

At Campus Canyon Academy, we use the Schoolwide Enrichment Model (SEM) educational approach in our program. Through the implementation of SEM, developed at the University of Connecticut, we provide all students meaningful, high-level, creative learning opportunities that allow them to develop their gifts, strengths and talents within the core curriculum to accelerate academic progress.

The model:

- Develops the gifts, strengths, and talents of each student;
- Provides enriching and challenging learning for all students;
- Offers appropriate intervention as needed;
- Gives advanced follow-up opportunities for students based on strengths and interests;
- Provides weekly interest based enrichment through our E3 Enrichment Cluster classes.

RTI Differentiation Model

The RTI Differentiation Model is used to continually analyze students' performance data in order to determine instruction, interventions and enrichment at levels of appropriate intensity so that student needs are effectively met, both academically and socially.

Overall our comprehensive program stresses:

- Personalized enrichment activities based on student interest
- Interest-based materials to challenge and engage students
- Opportunities to engage in research and independent study
- Opportunities to learn from college professors and college students
- Challenging creative thinking and problem solving opportunities
- Differentiated projects designed around student interests and needs
- Engagement and enthusiasm for learning
- A technology-rich learning environment

Benefits of Our 6-8th Grade Program

Some of the advantages of the Campus Canyon Academy 6-8th grade program are :

- Continued development of students' individual interests and skills through our magnet school themes
- Individualized attention and academic support
- Daily Targeted Instruction periods to support student success
- Access to Moorpark College and California Lutheran University's programs and resources;
- Smaller school atmosphere and community, providing opportunities for every student to feel affirmed and supported.
