

# Thank You for your partnership this year!

May 5th was School Lunch Hero Day and the Steilacoom Historical School District #1 went all out to show their appreciation for the incredible individuals who provide meals—everyday—for our students and staff.

What a joy it has been to feed and nurture the students of the Steilacoom and DuPont community this school year!

We will see you next fall—Have a great summer vacation everyone!

## Save the Bees!

Bees are important! Some crops, including blueberries and cherries, are 90% dependent on honeybee pollination.

Almonds depend entirely on the honeybee for pollination at bloom time! But honeybees are in decline. More than half of North America's 4,000 native bee species are in decline with 1 in 4 species at risk of extinction. Go to [thebeecause.org](http://thebeecause.org) to learn more about these great pollinators.

Did you know that there are more than **20,000 species of bees** around the world? About 1/5 of them pollinate plants across North America.

The Last Day of School  
is June 16th.

Have an amazing summer!
