

Summer Work

Review of Second Grade Math

Please note that this packet is for children who have completed the Illustrative Math 2. It is intended as a review, and not to introduce new concepts.

The link below will lead you to the sight for our new math program. You can review Illustrative math grade two, especially units 7-9.

<https://curriculum.illustrativemathematics.org/K5/curriculum.htm>

This year, we learned many important math skills including:

- Memorizing the addition/subtraction facts to 18
- Recognizing and creating fact families
- Skip counting
- Understanding place value
- Comparing and ordering numbers
- Completing patterns
- Measuring in inches and centimeters
- Telling time to the minute
- Writing fractions
- Rounding to the nearest ten
- Estimating the sum of two digit numbers
- Distinguishing between odd and even numbers
- Counting sets of coins
- Identifying two and three dimensional shapes
- Solving double digit addition/subtraction with and without regrouping
- Solving story problems and identifying the important information
- Reading bar graphs/pictographs/Venn Diagrams & tape grams
- Using repeated addition to develop a foundation for multiplication
- Using pictures to show the concept of equal groups

In order to keep their skills sharp over the summer, we recommend periodically reviewing the above skills and working on memorizing the addition/subtraction facts to 18.
