Board of Education Policy JCB: Transfers within the District

[Link to policy JCB](#)

Conditions of a Transfer

Transfers and requests for transfers are subject to Board of Education policies and guidelines, rules and procedures adopted by the superintendent pursuant to Board authorization.

1. As a general rule, students approved for an intra-district transfer request are not eligible for district transportation. However, you may be eligible for the “Parent Pay” option. Further information on this option may be obtained from the district Transportation Department at 816-321-5007, or the “Parent Pay” option form may be downloaded from the district website.
2. Re-application and approval is required prior to each school year.
3. Granting of a transfer request for one student does not necessarily mean all students within that household will be granted transfers.
4. The district may rescind any transfer granted.
5. Intradistrict transfer may affect MSHSAA eligibility for students. Specific questions regarding MSHSAA eligibility requirements should be directed to the building Activities Director.

(The rescinding of a transfer may happen if a student is not attending school regularly or is experiencing any other issues that indicate that the transfer school is not the school of best interest for the student).
